Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgment is made of the receipt of the amendment filed on 11/30/01. Claims 19, 22, 25, and 26 are currently pending.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 19, 22, 25, and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wing (US 4,623,965) in view of Schultz et al (US 5,542,487) (hereinafter referred to as 'Schultz') and Hitchcock (US 5,050,207).

Wing teaches an electronic checkbook 10 having a face plate 18 featuring an alphanumeric keyboard for receiving transaction data, a display screen 28 for displaying entries for review, and a print mechanism 30 for printing name, current date, amount (numerically and alphabetically), memorandum and check number on a check 38.

Wing lacks the teaching of a check printer encoding the check amount in magnetic ink at a predetermined location.

Schultz teaches a printer unit 10 which prints magnetic ink characters 27 on a form of a check (col. 3, line 60-col. 4, line 4).

One of ordinary skill in the art would have readily recognized that encoding the check amount in magnetic ink at the time the check is written helps to secure the check since the magnetic ink would be difficult for one to fraudulently manipulate in an attempt to change the check amount. The MICR encoding may also help to process the check quicker when the check is delivered to a banking/ check cashing institution. Therefore, it would have been obvious, at the time the invention was made, to modify the teachings of Wing with the MICR printing as taught by Schultz.

Wing/Schultz lack the teaching of an input receiving a payee name selected from a list of payee names by the user, a memory operable to store and recall the list of payee names, and a display to display the list of payee names.

Hitchcock teaches a portable automated teller machine which facilitates making a bill payment to a payee selected from a screen which indicates a list of prestored payees (col. 9, lines 17-26)

One of ordinary skill in the art would have readily recognized that storing the list of payees in a memory provides the user with a short-cut and time-saving method to printing the payees name in the payee field of the check. Therefore, it would have been obvious, at the time the invention was made, to modify the teachings of Wing/Schultz with the method of storing and recalling a list of payees as taught by Hitchcock.

Response to Arguments

3. Applicant's arguments with respect to claims 19, 22, 25, and 26 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
